The RAM FLAT® Compactor family has a little crusher that packs a punch just like it's big brothers... introducing the Model 5P, an all air-powered pail crusher that makes short work of a big problem.

**PAIL & CAN CRUSHER**
Model 5P RAM FLAT Compactor can reduce the volume of most containers by up to 90%. At 120 psi, a 17 inch tall 5 gallon pail becomes a 2.5 inch pancake while a 12 inch 1 gallon can is reduced to only 1 inch.

**AIR POWERED**
The pneumatic Model 5P RAM FLAT Compactor only needs clean, dry compressed air. And because there is no electrical power needed, the Model 5P is already explosion proof.

**SIMPLE OPERATION**
The container is placed inside the chamber and the safety interlock door is closed. The Model 5P operates only when the door is closed and the Palm Button is depressed. When the Palm Button is released, the crushing head automatically returns to its start position.

**AVAILABLE ACCESSORIES**
- Air Regulator: with an air line lubricator and Filter. Also includes OSHA standard Safety Valve with a lock out/ tag out valve (LOTO) to relieve air from the lines and cylinder.
- Floor Stand: Forty inch high structural steel floor stand permits the operator to work at bench height. The stand also permits a 55 Gallon drum to be placed under the Model 5P for easy disposal of the pails.

---

**Crushing Force:**
- 120 psi = 6,000 lbs. 8.4kg/cm² = 2,722 kg
- 100 psi = 5,000 lbs. 7.0kg/cm² = 2,268 kg
- 90 psi = 4,500 lbs. 6.3kg/cm² = 2,041 kg

**Cycle Times:**
- 15 sec. at 120 psi
- 39 sec. at 90 psi
- 15 sec. at 8.4 kg/cm²
- 39 sec. at 6.3 kg/cm²

**Chamber Dim:**
- 14'' door width
- 17'' height
- 356 mm door width
- 432 mm height

**Outer Dim:**
- 16.125'' wide
- 17.187'' deep
- 44.125'' high
- 410 mm wide
- 437 mm deep
- 1,121 mm high

**Shipping Weight:**
- 275 lbs.
- 125 kg
