SAFELY

EMPTIES AEROSOL CANS
COLLECTS LIQUID CONTENTS
FILTERS VOCs

The only aerosol can recycling technology certified in the joint U.S. Environmental Protection Agency and California EPA Environmental Technology Verification and Certification Program.

With **aerosolv**, Recycling Aerosol Cans Is As Easy As...Using Them.

The Aerosolv Aerosol Can Recycling System Simplifies Aerosol Can Disposal

The Aerosolv puncturing unit threads directly to the 2" bung of any 30-gallon or 55-gallon drum. Simply place an aerosol can into the Aerosolv unit and lock the safety cap. With a press of the handle, a carbide-tipped puncture pin pierces the dome of the can. The carbide-tip is non-sparking, one of many safety features you'll appreciate about the Aerosolv system.

Liquids, Collect Directly Into the Drum

That's the neatest feature of the system. Residual liquids collect safely in the drum, ready for eventual transportation without further handling. And one 55-gallon drum will hold the residual liquids from 4,000 spent aerosol cans. As solid waste, the same cans would require at least forty 55-gallon lab-pack drums at a disposal cost of \$12,000 or more.

Residual Propellant is Filtered of VOCs

The Combination Filter threads directly to the 3/4" bung of the drum, one of the many safety features incorporated into the system. Although not required by RCRA for aerosol can disposal, the filter addresses air quality and emissions standards.

The Combination Filter Does Two Things

The base of the Combination Filter is the Coalescing Cartridge. In it, the specially designed filter media coalesces microscopic liquids from the escaping propellant and forms them into droplets. The droplets collect in the reservoir of the Coalescing

Cartridge and can be easily drained, directly into the drum if desired, by opening the drain valve on the bottom. Dry propellant then moves through the Activated Carbon Cartridge which adsorbs hydrocarbons and odor.

Accommodates a wide assortment of aerosol cans, even 3" jumbo cans. Whatever size can, the Aerosolv unit smoothly pierces the dome.

The Activated Carbon Cartridge Contains 1 ¼ Pounds of Activated Carbon

Made from ground coconut shell, the activated carbon promotes rapid evacuation of the propellant from even a full aerosol can. Independent lab tests indicate that VOC removal is significant: the propellant from a full can measured 70% below the OSHA Short Term Exposure Limit (STEL) for Toluene and 95% below for Xylene. From an empty can, the propellant measured 98% below the STEL for both. Total hydrocarbon emissions measured 70% below the 300 ppm desired limitation. The new colorimetric carbon cartridge will clearly indicate cartridge replacement for maximum efficiency.

The Result? Recyclable Steel and RCRA Compliance

After using the system, you've got an empty steel can with a small, smooth-edged hole. In as little as five seconds. No spills. No jagged edges. And, no compressed gas, so it's ready for recycling with your other scrap steel.

With a simple half turn, remove and replace the Activated Carbon Cartridge as needed.

When Is An Aerosol Can Empty?

Relieve the Pressure of Aerosol Can Disposal

An aerosol can can't be relieved of pressure through normal use. Even when "empty", the retained propellant can react to heat or pressure when crushed or bailed. With the system, you can safely puncture the aerosol can, relieve the pressure, and collect any residual liquids. By recycling the punctured aerosol cans, you'll eliminate an entire category of waste from your waste stream.

Prevent Static Build-Up...Automatically

Each system is shipped with an Anti-Static Wire. The six-foot length anti-static wire provides convenient installation, anywhere in your plant. Attached to the unit by a brass screw and ring-terminal, it prevents static build-up by grounding the drum, as required by OSHA for liquid storage vessels.

Install an Aerosolv System on Separate Drums

By setting up the system on several drums in a shop, you can collect residual solvents into one drum and residual paints into another. The solvents can be recycled right in the shop as parts cleaner. Paints can be reclaimed, often resulting in waste minimization credit. And, of course, you've got the empty aerosol can, to be recycled with other scrap steel.

Designed for safety and longevity, the Puncture Pin point is non-sparking carbide and has shown no visible wear after 10,000 uses.

The punctured can has no sharp jagged edges or crushed metal.

“... a steel aerosol can that does not contain a significant amount of liquid (e.g., a can that has been punctured and drained) would meet the definition of scrap metal (40 CFR 261.1(c) (6), and, if it is to be recycled, would be exempt from regulation under 40 CFR 261.6(a) (3) (iv). Scrap metal that is recycled is exempt from RCRA regulation under this provision even if it is hazardous waste, so generators need not make a hazardous waste determination.”

Whether you bake bread or build ships, refine oil or print books, brew beer or fly jets, make paper or

Your Plant Uses Aerosols Every Day

Aerosol products are sometimes used on the production line. But they're always used in maintaining your plant and your capital machinery. In maintenance shops throughout your facility, whether it's the Instrument Shop or Paint Shop, HVAC Shop or Welding Shop, Machine Shop or Auto Garage, aerosol products are used on a daily basis, increasing productivity and equipment longevity.

Aerosols Make Tough Jobs Easier

Aerosols... paints, solvents, lubricants, belt dressing, silicone releases, graphite, anti-seize, cutting fluids, contact cleaners, adhesives, coolants. They are so widely used because they offer the best method of delivery in hard-to-reach places. The most precise method of delivery where precision matters. The most efficient method of delivery where productivity matters.

Put the Aerosol System to Work for You

Chances are, your plant uses more aerosols than you think. If you're in compliance, you're probably spending a lot for disposal. Start recycling your aerosols with Aerosolv.

“ Thank you for your continued interest in our recycling program. During the period from 1 October 1992 to 31 September 1993, COMNAVBASE Norfolk realized a savings of \$333,738.00 by utilizing the Aerosolv Aerosol Can Recycling System. The Aerosolv system was implemented as an alternative to the previous practice of hazardous waste disposal of aerosol cans bulked in drums as solid waste. ”

Commander
Naval Base Norfolk
UNITED STATES NAVY

“ Fortunately, we discovered the Aerosolv disposal system. We have been able to reduce this overstock at an amazing rate, with no effect on our generator status and at a fraction of the cost for disposing of these items in their original form. ”

Stuart Jones
Safety and Environmental Engineer
FLEXIBLE PRODUCTS COMPANY

“ Since we've been using the Aerosolv unit, our disposal costs for aerosol cans have dropped 80%. ”

aerosolv®

Aerosol Can Recycling Systems Aerosolv Model 5000

INCLUDES: Puncturing Device, # 6163 Combination Coalescing Activated Carbon Filter, Anti-Static Wire, and Safety Goggles

Aerosolv Model 7000

INCLUDES: Advanced Puncturing Device-Teflon Coated, Automatic Shut-off Valve, # 7163 Combination Colormetric Carbon Filter, Anti-Static Wire, and Safety Goggles

Aerosolv Model 7000XL

INCLUDES: Advanced Puncturing Device-Teflon Coated, Automatic Shut-off Valve, # 7163XL Combination Colormetric Carbon Filter with Automatic Check Valve, Drum Cover, Drum Under Containment, Anti-Static Wire, and Safety Goggles

Replacement Parts

Filters

- #6163 Combination Coalescing Filter with Replaceable Activated Carbon Cartridge
- #6363 Replacement Activated Carbon Cartridges (pkg. of 2)
- #7163 Combination Coalescing Filter with Replaceable Colormetric Carbon Cartridge
- #7363 Replacement Colormetric Carbon Cartridges (pkg. of 2)
- #7163XL Combination Coalescing Filter with Replaceable Colormetric Carbon Cartridge and Automatic Check Valve
- #7363XL Replacement Colormetric Carbon Cartridges with Automatic Check Valves (pkg. of 2)

Accessories

- #5165 Maintenance Repair Kit
INCLUDES: 1-Carbide-Tipped Puncture Pin with O-Rings, 1-Aeroprene Gasket, 1-Spring, 3-Bridge Pins, 1-Tube of Grease
- #5129 Aeroprene Gasket
