

### Highest Safety Standards

The AeroVent<sup>®</sup> 1X is compliant in all 50 states and conforms to OSHA, EPA and California regulations.

Its unique design makes it the safest manual aerosol can disposal system available.

A single stroke operation seals the chamber and punctures the can, protecting the operator at all times. Other systems rely on a multistep clamp process and O-rings which may cause leaks and hazardous blow back into the operator's face.

Safe2Vent<sup>®</sup> activated carbon filter absorbs VOC's and harmful vapors.

The bouncing Viz-a-Ball™ tells the operator when the can is completely depressurized and safe to remove.

Plus, when not in use, the system is completely sealed to reduce any contamination in the processing area.

Non-Sparking features include an aluminum chamber with cobalt puncture tip and grounding cable which minimizes any fire risk.

### Product Overview

The AeroVent<sup>®</sup> 1X Aerosol Can Disposal System allows you to quickly puncture and drain aerosol cans to reduce the cost of hazardous waste. Plus, it is 50 state compliant and the safest, most efficient product available.

### Fast and Simple to Use

The AeroVent<sup>®</sup> 1X operation is as simple as **One, Two, Three:**

1. Just place an aerosol can in the AeroVent<sup>®</sup>1X and close the lid with the convenient handle- clamp. This automatically seals the chamber and then punctures the aerosol can.
2. Wait until the Safe2Vent<sup>®</sup> filter's Viz-a-Ball™ stops bouncing (usually 5-30 seconds). This indicates the system has been depressurized and is safe to open
3. Open the lid and remove the can. It is that simple! Now the aerosol can may be disposed of as scrap metal or recycled.

<b>Specifications Item Name</b>	AeroVent <sup>®</sup> 1X Aerosol Can Disposal System Part #10004700
<b>Application</b>	Aerosol can disposal and recycling
<b>Capacity</b>	1 can, 2" to 3" in diameter, up to 10.5" length
<b>Cycle time</b>	5-30 seconds, dependent on volume of propellant
<b>Equipment Requirements</b>	30 or 55 gallon metal drum
<b>Dimensions</b>	11" H x 8" W x 30" L
<b>Warranty</b>	18 Months
<b>Shipping weight</b>	29 lbs
<b>Origin</b>	Made in the USA, TAA Compliant
<b>Includes</b>	AeroVent <sup>®</sup> 1X Aerosol can disposal machine, Safe2Vent <sup>®</sup> Drum Vent Filter, Ground Cable

Reduce the cost of Hazardous waste

With the AeroVent® 1X Aerosol Can Disposal System

## Product Features

**Cycle Counter:** The counter makes the process convenient by eliminating the need for manual counting and guessing when to change filters. The all new Cycle Counter automatically keeps track of the number of cans processed. Easily identify when to change filters and schedule replacements.

**Exclusive Viz-a-Ball™ Indicator Check Valve:** This revolutionary design serves two essential functions. First, it keeps the operator safe by indicating when the system is completely depressurized and can be opened. Second, the ball check valve complies with OSHA, EPA and California regulations requiring the drum to be closed and prevent vapors from escaping into the atmosphere after processing. The **Safe2Vent®** is the only drum vent filter that includes this important safety feature.

**Safe2Vent® Filter:** It's cellulose construction is 96% biodegradable, may be recycled more easily, and decomposes naturally. Other drum vent filters that are plastic encased may require more extensive recycling or disposal processes.

**Safe2Vent®** contains more carbon media than any other filter available and lasts longer. Plus, each replaceable filter includes the coalescing element for convenient and safe handling.

**Versatile:** The **AeroVent® 1X** is designed for the smaller volume user. It's unique tray design accepts a variety of aerosol can sizes up to 3 inches diameter and 10.5 inches in length with just the one tray. Quick change aluminum plugs accommodate most common sizes of aerosol cans making the **AeroVent®1X** the **one-size-fits-all** disposal system.
